

ELECTROTRADE

COMPANY PRESENTATION

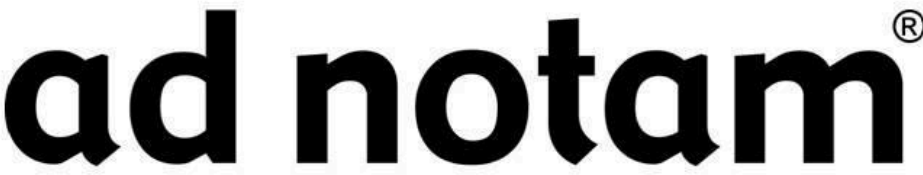

The Company

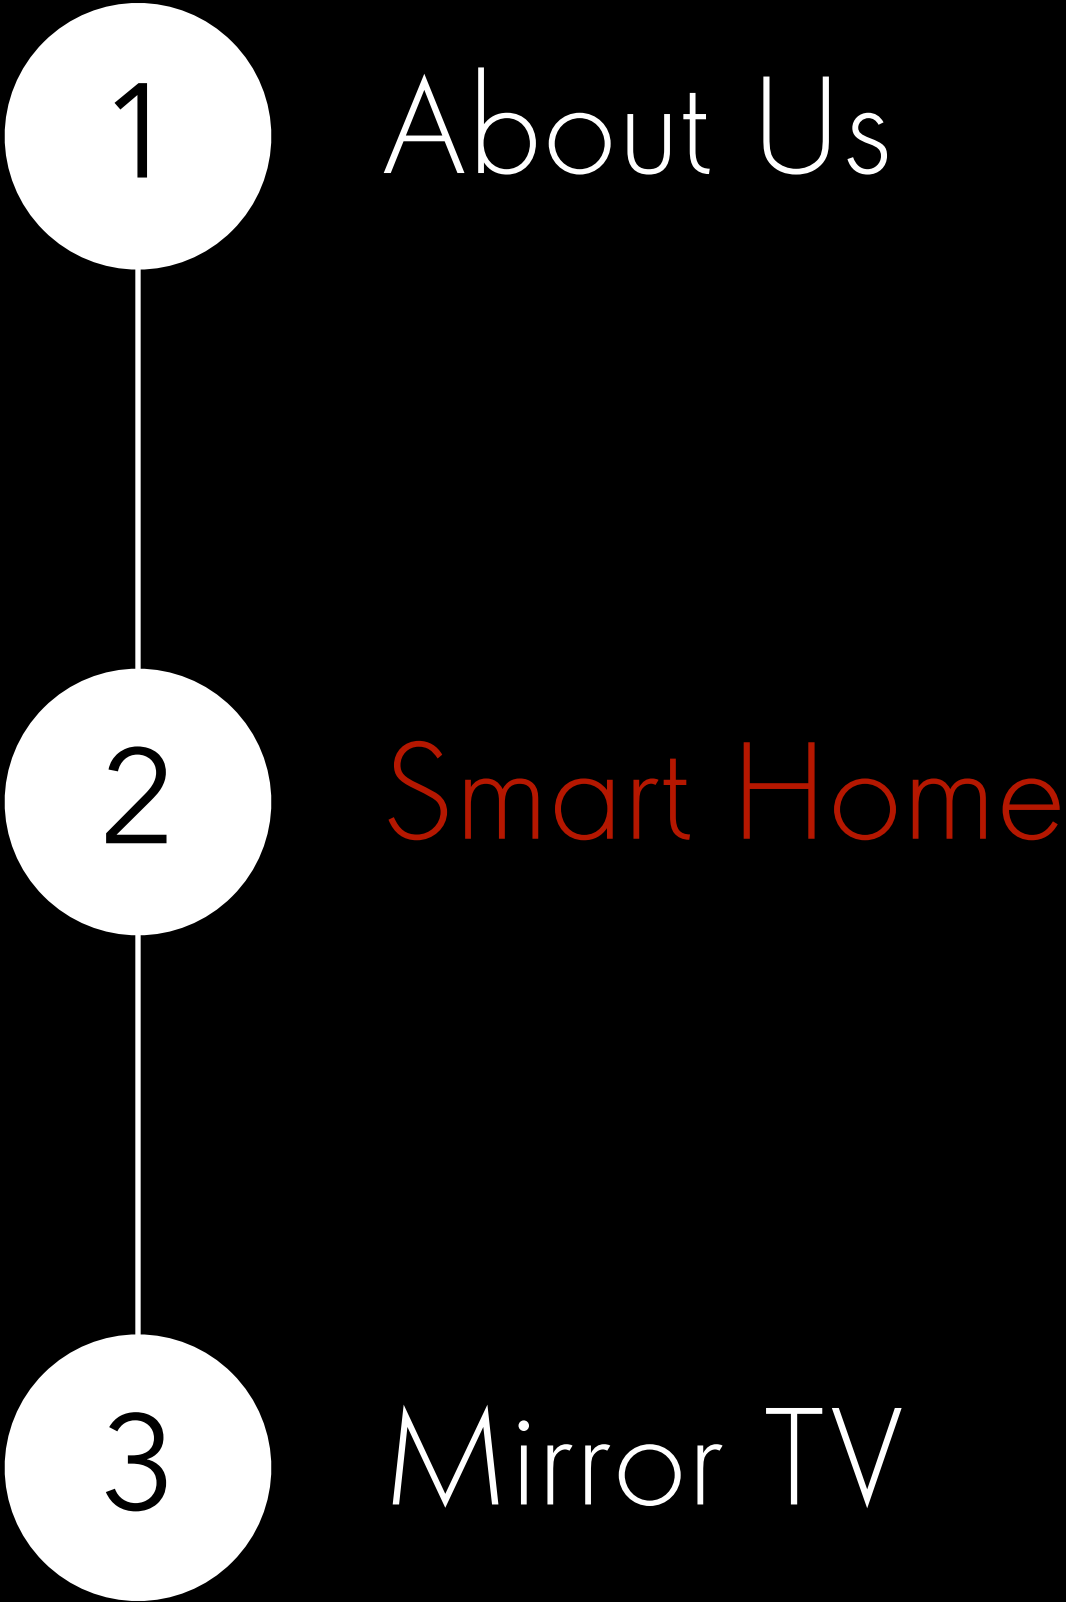

Electro Trade has been in the electrical switchgear business since 1990. Over the years, we have slowly diversified into allied business lines of lightning and earthing solutions, surge protection devices, manufacturing of H.T and L.T control panels, and IP66 enclosures and IP67 plugs & sockets – all by the best global brands in the segment.

In 2012, we forayed into the residential sector as smart home system integrators. Two years later, we added mirror TVs to our offering.

We believe in technology that makes life easier and integrate devices that simplify everyday tasks. We offer the best devices from all over the world that are on the bleeding edge of both technology and design.

Our Brands

Smart Home Solutions
